Dia De Los Muertos concept overview

Windows (game platform)
Target Age: 10+
Rating: E10+

Game Summary: Dia De Los Muertos is a cultural representation and educational brawler about the day of the dead, a popular holiday in Mexican culture. You are Miguel, the trustworthy grandson of your abuelita, and you must fight through hordes of zombies to collect all of the items that you need for the ofrenda. Defeat zombies by punching, strumming your guitar, and throwing tequila bottles to reach the ofrenda. An ofrenda is an altar with memorabilia of a family's ancestors. Once you have completed the ofrenda, you dispel the restless dead and successfully honor your grandmother.

Game Outline: First, players discover our characters Miguel and Abuelita in a cutscene. Then, players use WASD to move, and JKL to attack. There are three levels, each of increasing difficulty in the form of faster zombie spawn rates and a new enemy type: La Catrina. To progress to the next level, the player must break pots to find an item hidden inside to put on the ofrenda. Once completing each of the three levels, the player finds the ofrenda and places the items on it.

Unique Selling Points

- Presents strong themed representation of Mexican culture
- Combat is fast paced and thrilling, often difficult
- Completion of the game is satisfying
- Two enemy types with unique AI
- Stunning music and appearance
- Fight hordes of zombies!
